5 August 1958

Assistant for Special Projects, OPR

SA to Ch/G/RR

Vital Materials

REFERENCE: Your memo, same subject, dated 4 August 1958

1. Per our conversation this morning, the "Army Urban Intelligence Reports" is the sole item in the referenced memo which the Geographic Research Area desires to be held at the Vital Materials Repository indefinitely. Other selected items are contained in the listing submitted to you on 29 May 1958.

2. The Army Urban Intelligence Report series [REDACTED] is desired for indefinite retention because it is a major source of basic intelligence on the Far East. To date, there have been some 400 detailed urban maps produced in the series, each with accompanying target lists; about 150 include an analytical text. The Reports are unique and would constitute a resource of great value in emergency operations.
